## ABOUT US

Established in the year 2010, we, "National Engineering Works", acquired a prominent position in the market with our outstanding accomplishments in the field of **Engineering, Surveying & Solution**. We have fabricated this plant machinery by using superior quality raw material. Our well-coordinated management and competent team work has helped us achieve marked recognition in the market. We dispatch Our products only after passing through quality assurance tests Our mentor is "IRSHAD KHAN' who bears all the credit for the efficient team work that our company does It is all due to his efforts that the organization has been successfully taking bulk orders over the year.

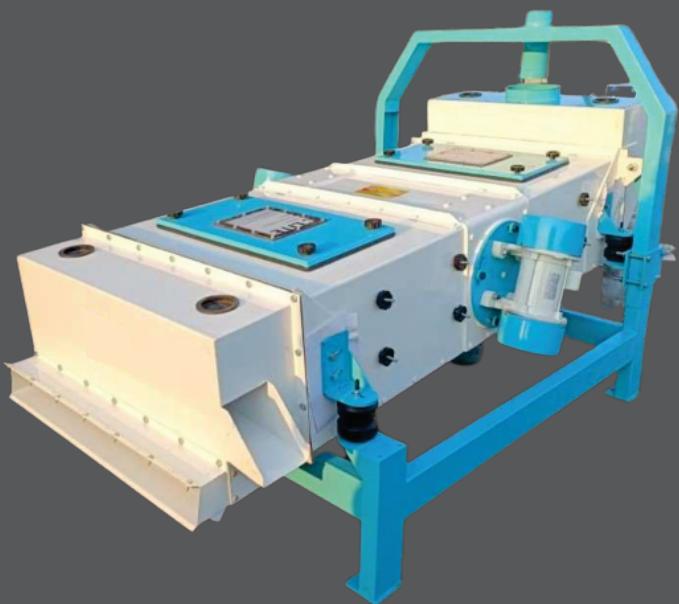

Our Company is based in Solapur (Maharashtra, India), which is the hub of manufacturing plants. With the availability of the required raw material and equipment. it becomes easier for us to produce the milling plant in lesser time and deliver it to our clients a stipulated time-frame. Our employees are provided modern and advanced machinery to manufacture the milling paint machines

### Next Generation of Grain Processing Machine

Our vision is to be one of the most trusted manufacturer and supplier of grain processing machinery and equipment from India."

## VIBRO CLASSIFIER

National Vibro Cleaning machine can efficiently separate over sized & undersized impurities the machine can also be used for grading different size of products. The machine inbuilt cleaning system.

## DE-STONER (CLEANING)

National Vibro Paddy De-stoner is meant to clean Paddy and removes Dust, Impurities and stone. The machine consists of mainly two vibro motor and screen frame.

## Elevators

This bucket elevator is designed to vertical conveying the material from one machine to other machine for different process from cleaning section to final section. This machine is equipped with food grade belt, finger gripped pulleys, different sizes of buckets for different capacities.

▲ **Roll Petty**

▲ **Seler**

▲ **New Model Roll Petty**

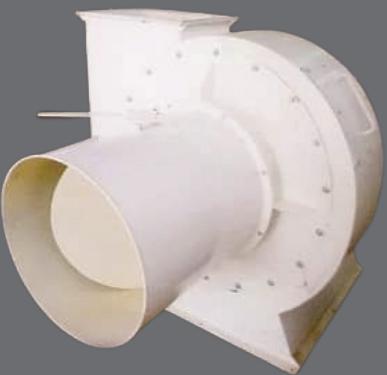

**PULVERIZER**

**OIL DAMPENER**

**FATKA  
MACHINE**

**BLOWER  
MACHINE**

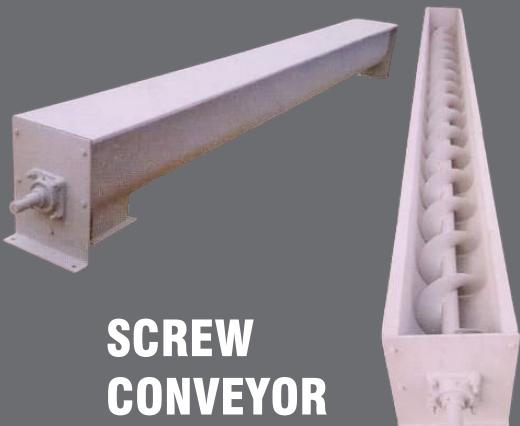

**ROTARY  
AIRLOCK**

**HORIZONTAL  
CYCLONE**

**DAL-POLSHER**

**SCREW CONVEYOR**

**RILL MACHINE**

**ATTA CHAKKI**

**CYCLONE**

**ASPIRATION DUCTING MATERIAL**

**BUFF POLISHER**

**SPOUTING MATERIAL**

**Pre Cleaner**

The PRE CLEANER is uniquely designed and highly efficient for removes large & fine impurities, sand & light material.

- Features**
- Adjustable processing Deck's inclination.
  - &
  - Two/three Decks of sieves, choice of screen as per requirement.
- Advantage**
- Adjustable vibration (frequency & Amplitude)
  - Perfect screening efficiency.
  - Low maintenance, low power

## OUR TEAM

Consistency in business development is the key which is achieved through hard work and good performance of our team of professionals. Utilizing their knowledge and active participation, we are able to meet challenging tasks in this industry with positivity and confidence. Our professionals work in close coordination with each other and treat fellow members with courtesy. These professionals are selected through a rigorous round of interviews conducted by our operating managers on the bases of their quick learning ability, practicality, and business developing sense.

## INFRASTRUCTURE

For sustainable development, we have setup a sophisticated infrastructure base unit that is facilitated with state-of-the-art technologies and machines. In order to bring uniformity in the manufacturing process this unit is divided into different functional units such as manufacturing, quality testing, warehousing, packaging, etc. The installed machines are handled by our skilled technicians who are trained in operating these machines and enable us to fulfil bulk and urgent demand of our clients. Our infrastructure base unit remains the strength of our organization and helps us in achieving the goal of client-satisfaction.

National Engineering Works always gives priority to its valuable client's requirements. The Round grader present is manually adjusted by using stepless adjustable drive that separates groundnut, toor dall & chana dall. By using this screen the groundnut, toor dall & chana dall moves towards the center and is collected through the duct available. While the Groundnut, toor dall & chana dall are collected around outer rim of the screen and are ejected out through the outlet duct. This machine divides grains into four types such as sticks, clay/dust, light seeds and finish goods.

**Round Grader**

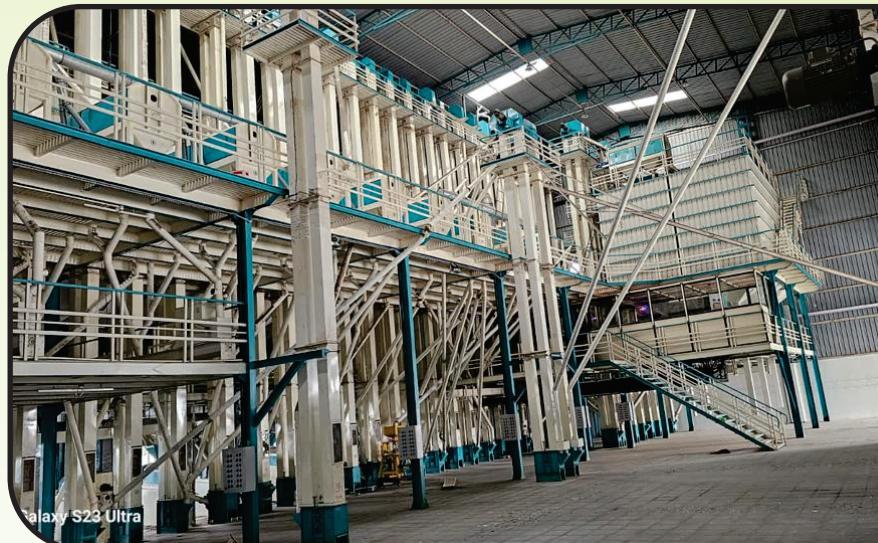

## Gravity Separators

The machine is specifically meant for removing impurities and achieving very high grading quality in any free flowing granular material, grains, all types of seeds, pulses, spices etc. It removes the impurities and upgrades the material on the principle of specific weight.
